ANIL CHOUDHARY

DevOps and Cloud Engineer

📞 +91-9993371923   @ anil.vcr22@gmail.com   🔗 linkedin.com/in/anil-choudhary-vcr22   📍 Indore, India

SUMMARY

I am a certified DevOps professional with a strong foundation in Git, Jenkins, Docker, Kubernetes, Ansible, Terraform, and AWS. I possess hands-on experience in designing, automating, and maintaining scalable infrastructure. I am driven to enhance CI/CD and cloud operations, seeking an entry-level role in DevOps or Cloud Engineering where I can effectively apply my skills for optimal performance

EXPERIENCE

Python Developer Intern

Rellins Technologies

📅 01/2020 - 06/2020   📍 Mohali

A technology solutions provider

- Developed RESTful APIs and integrated them into applications using Python
- Built a chatbot using Python for interactive user communication

Technical Support Associate

Conneqt Business Solutions Limited

📅 07/2018 - 11/2019   📍 Mohali

Company specializing in providing business solutions

- Delivered technical and customer support in a high-volume, fast-paced environment, addressing inquiries via phone, email, and chat platforms
- Diagnosed and resolved software and network-related issues, ensuring timely solutions and minimal customer downtime
- Collaborated cross-functionally with Tier 2 and engineering teams to escalate and resolve complex technical problems
- Responded to customer inquiries daily across phone, email, and chat, resolving issues efficiently while maintaining high customer satisfaction

Android Developer Intern

Sebiz Infotech

📅 01/2018 - 06/2018   📍 Mohali

A company offering IT services and solutions

- Completed training in Android application development focused on building mobile applications for the Android operating system
- Developed a real-time chat application using Java, XML, Android Studio, and Firebase

EDUCATION

Master of Computer Applications

Lovely Professional University

📅 08/2016 - 05/2018   📍 India

Bachelor of Science in Computer Science

Devi Ahilya Vishwavidyalaya

📅 08/2013 - 05/2016   📍 India

CERTIFICATION

DevOps and Cloud Computing

Physics Wallah, May 2025

Python

GeeksForGeeks, Aug 2024

AWS

Udemy, May 2024

Django

Udemy, Oct 2020

Mongo Db

Udemy, Jul 2020

SKILLS

Devops Tools

Git, GitHub, Jenkins, Ansible, Docker, Kubernetes, Terraform, GitHub Actions, CI/CD Pipelines

Cloud Platforms

AWS

Automation & Scripting:

Terraform, Ansible

Programming Languages:

Python

Soft Skills:

Problem Solving, Collaboration, Communication, Adaptability

PROJECTS

Todo-App

📅 01/2020 - 06/2020

A ToDo application project that involved cloud deployment and DevOps practices

- Designed and deployed a scalable, cloud-native ToDo application on AWS using a complete DevOps toolchain
- Used Terraform for Infrastructure as Code (IaC) to provision scalable AWS infrastructure, including EC2 instances, VPCs, S3 buckets, and security groups
- Automated server setup and configuration using Ansible playbooks
- Containerized the application using Docker for consistency
- Deployed Docker containers to AWS EC2 instances, ensuring performance and high availability
- Built a CI/CD pipeline to automate builds and deployments, reducing downtime and accelerating release cycles
